Date: October 6, 2026

Quote Ref: CATERFLOW-AUDIT-2026-10-06

This quotation covers the one-time changes arising from the Caterflow audit of 6 October 2026. It excludes subscriptions, monthly fees, hosting and ongoing support.

#	Description	Deliverables	One-time Fee (SZL)
1	Dispatch duplication fix Investigate and fix dispatches being recorded twice (e.g. two breakfast dispatches); confirm stock levels are unaffected and clean up the existing duplicate records.	Root-cause fix, duplicate-submission guard, data clean-up script, regression tests.	1,200
2	VAT handling and purchases reconciliation Establish whether VAT affects the Purchases figures that differ between the physical report and the system report; add support for VAT-free items; correct VAT calculations in exported data.	VAT-exempt item flag, corrected VAT maths in purchases and exports, reconciliation of physical vs system purchases.	3,000
3	Invoice OCR into Purchase Order Read an uploaded proof/invoice using OCR and pre-fill the Purchase Order lines for review before saving.	Upload and OCR pipeline, field mapping to PO lines, review and edit screen, error handling.	4,500
4	Negative stock and item pricing across facilities Find why opening and closing stock go negative; resolve unit prices changing over time and prices not being shared between facilities through the item-facility link.	Stock calculation fix, price history/consistency rules, shared item-price logic across facilities.	3,500
5	Report accuracy and facility-specific reports Correct the output/input figures; allow reports for a specific facility; stop items appearing in a facility's exported report when they were never bought, received or dispatched there.	Corrected input/output totals, facility filter on reports and exports, exclusion of unused items.	3,000
6	Closing value from weekly bin count Set the closing stock value from the Friday bin count, since counts are done once a week.	Bin-count-driven closing value, period handling, report integration.	2,000
7	Receiving: supply source Let the person receiving stock record where the supply is coming from.	Source field on receiving, validation, display in receiving records and reports.	1,000
8	Dispatch precision and decimal input Allow dispatching the full remaining quantity (e.g. 0.5 of 0.5 available, leaving stock at exactly 0); fix decimal entry for amounts under 1 kg where the dot is not accepted.	Floating-point/rounding fix, decimal keyboard and input handling, tests for edge values.	1,200
Total			19,400

Scope of Work

- **Dispatch duplication fix:** Investigate and fix dispatches being recorded twice (e.g. two breakfast dispatches); confirm stock levels are unaffected and clean up the existing duplicate records.
- **VAT handling and purchases reconciliation:** Establish whether VAT affects the Purchases figures that differ between the physical report and the system report; add support for VAT-free items; correct VAT calculations in exported data.
- **Invoice OCR into Purchase Order:** Read an uploaded proof/invoice using OCR and pre-fill the Purchase Order lines for review before saving.
- **Negative stock and item pricing across facilities:** Find why opening and closing stock go negative; resolve unit prices changing over time and prices not being shared between facilities through the item-facility link.
- **Report accuracy and facility-specific reports:** Correct the output/input figures; allow reports for a specific facility; stop items appearing in a facility's exported report when they were never bought, received or dispatched there.
- **Closing value from weekly bin count:** Set the closing stock value from the Friday bin count, since counts are done once a week.
- **Receiving: supply source:** Let the person receiving stock record where the supply is coming from.
- **Dispatch precision and decimal input:** Allow dispatching the full remaining quantity (e.g. 0.5 of 0.5 available, leaving stock at exactly 0); fix decimal entry for amounts under 1 kg where the dot is not accepted.

Notes

- Implementation estimate: ~48–52 developer hours in total, expected within 6 to 8 weeks due to after-hours and weekend availability.

- Where an audit item needs investigation first (VAT impact, negative stock, purchases mismatch), the fee covers diagnosis and the fix for the cause found. Any structural change beyond that will be quoted separately.
- Invoice OCR relies on the quality of the uploaded proof. Any third-party OCR service charges are paid directly by the client to that provider.
- Client acceptance of this quotation authorises G-Solutions² to begin work. A signed acceptance or written confirmation via email is required.
- This quote does not include any subscription, hosting, or Sanity plan fees. Any additional feature requests will be quoted separately.
- **Work will only commence once the SZL 9,700 deposit (50%) has been received AND this quotation has been signed and returned to G-Solutions². The balance of SZL 9,700 is due on completion.**
